

# FUND UPDATE

## BCF KiwiSaver Scheme

for the year ended 31 March 2022

This fund update was made publicly available on 7 July 2022.

### WHAT IS THE PURPOSE OF THIS UPDATE?

This document tells you how the fund has performed and what fees were charged. The document will help you to compare the fund with other funds. Arotahi Trust Limited prepared this update in accordance with the Financial Markets Conduct Act 2013.

This information is not audited and may be updated.

### DESCRIPTION OF THIS FUND

The fund is invested principally in term deposits with New Zealand-registered banks but also has a small exposure to a loan made on arm's length terms to an organisation within the Brethren Christian Fellowship. Further diversification could happen once the fund reaches a critical size (as determined by the Trustee).

The current investment objective for the fund is to achieve a real return (before investment costs and tax) which exceeds the return of the S&P/NZX 90 Day Bank Bill Index over rolling one-year periods.

Total value of the fund	\$12,326,626
Number of investors in the fund	689
The date the fund started	1 April 2011

### WHAT ARE THE RISKS OF INVESTING?

Risk indicator for the BCF KiwiSaver Scheme<sup>1</sup>:

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at [www.sorted.org.nz/tools/investor-kickstarter](http://www.sorted.org.nz/tools/investor-kickstarter).

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for 5 years to 31 March 2022. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the Product Disclosure Statement (PDS) for more information about the risks associated with investing in this fund.

## HOW HAS THE FUND PERFORMED?

	Average over past five years	Past year
Annual return (after deductions for charges and tax)	1.42%	0.75%
Annual return (after deductions for charges but before tax)	1.91%	0.91%
Market index annual return (reflects no deduction for charges and tax)	1.28%	0.55%

The market index return is the return from the S&P/NZX 90 Day Bank Bills Index. Additional information about this market index is available in the *Other Material Information* document for the fund on the offer register at [www.disclose-register.companiesoffice.govt.nz](http://www.disclose-register.companiesoffice.govt.nz) (Search for *BCF KiwiSaver Scheme*).

## ANNUAL RETURN GRAPH<sup>2</sup>

This shows the return after fund charges and tax for each complete year ending 31 March since the fund started. The last bar shows the average annual return since the fund started, up to 31 March 2022.

**Important:** This does not tell you how the fund will perform in the future. Returns in this update are after tax at the highest prescribed investor rate (PIR) for an individual New Zealand resident. Your tax may be lower.

## WHAT FEES ARE INVESTORS CHARGED?

Investors in the BCF KiwiSaver Scheme are charged fund charges. In the year to 31 March 2022 these were:

% of net asset value	
<b>TOTAL FUND CHARGES</b>	<b>0.89%</b>
Which are made up of:	
<b>TOTAL MANAGEMENT AND ADMINISTRATION CHARGES</b>	<b>0.89%</b>
Including:	
Manager's basic fee	0.89%
Other management and administration charges	0.00%
<b>TOTAL PERFORMANCE BASED FEES</b>	<b>0.00%</b>
Dollar amount per investor	
<b>OTHER CHARGES</b>	<b>52</b>

Investors may also be charged individual action fees for specific actions or decisions (for example, for withdrawing from or switching funds). See the PDS for more information about those fees.

Small differences in fees and charges can have a big impact on your investment over the long term.

## EXAMPLE OF HOW THIS APPLIES TO AN INVESTOR

Lucy had \$10,000 in the fund at the start of the year and did not make any further contributions. At the end of the year, Lucy received a return after fund charges were deducted of \$75 (that is 0.75% of her initial \$10,000. Lucy also paid \$52.00 in other charges. This gives Lucy a total return after tax of \$23 for the year.

## WHAT DOES THE FUND INVEST IN?

### Actual investment mix

This shows the types of assets that the fund invests in

New Zealand fixed  
interest, 21.91%

cash and  
cash  
equivalents,  
78.09%

### Target investment mix

This shows the mix of assets that the fund generally intends to invest in.

New Zealand fixed  
interest, 30.00%

cash and  
cash  
equivalents,  
70.00%

## TOP 10 INVESTMENTS

	Name	% of fund net assets	Type	Country	Credit rating (if applicable)
1	KiwiBank Term Deposit	24.06%	cash and cash equivalent	NZ	
2	TSB Term Deposit	18.11%	cash and cash equivalent	NZ	
3	Westpac Term Deposit	14.75%	cash and cash equivalent	NZ	
4	UBT Invest	13.80%	NZ fixed interest	NZ	
5	BNZ Term Deposit	10.40%	cash and cash equivalent	NZ	
6	ASB Term Deposit	9.76%	cash and cash equivalent	NZ	
7	East Street Property Trust	8.12%	NZ fixed interest	NZ	
8	ANZ Current Account	1.00%	cash and cash equivalent	NZ	
9					
10					

The top 8 investments make up 100.00% of the fund.

Refer to the Statement of Investment Policy and Objectives for more information which is available from [www.disclose-register.companiesoffice.govt.nz](http://www.disclose-register.companiesoffice.govt.nz).

## KEY PERSONNEL

This shows the directors and employees who have the most influence on the investment decisions of the fund.

	Name	Current position	Time in current position	Previous or other position	Time in previous or other position
2	Maurice Allen Hall	Director of Arotahi Trust Limited	9 years		
3	John McKay Mason	Director of Arotahi Trust Limited	9 years		
4	Jeffrey Paul Prestidge	Director of Arotahi Trust Limited	2 years, 2 months		

## FURTHER INFORMATION

You can also obtain this information, the PDS for the BCF KiwiSaver Scheme, and some additional information from the offer register at [www.disclose-register.companiesoffice.govt.nz](http://www.disclose-register.companiesoffice.govt.nz).

## NOTES

- 1) The risk indicator calculation method used is as follows:
  - with respect to investments in term deposits and amounts held on current account (in benchmark terms an intended 70% of Scheme assets, which is therefore the allocation used for asset weighting purposes) to use the S&P/NZX 90 Day Bank Bills Index (NZ Bank Bills Index);
  - with respect to the direct loan investment (approximately 15% of Scheme assets, which is the allocation used for asset weighting purposes) to:
    - use the S&P/NZX Investment Grade Corporate Bond Index (NZ Bond Index); and
    - multiply by 5 each month's returns from the NZ Bond Index (whether positive or negative) to reflect the loan investments being assessed as having materially higher risk than investing according to the NZ Bond Index; and
  - with respect to our intended UBT Invest NZ Funds investment (approximately 15% of Scheme assets, which is the allocation used for asset weighting purposes) to use the returns over the relevant period from the Sovereign Capital Trust, which is a wholesale managed investment scheme operating within the Plymouth Brethren Christian Church.

As a result, the risk indicator may provide a less reliable indication of the potential future volatility of the fund.

- 2) Because there is no appropriate market index for the fund's New Zealand fixed interest investment, the market index annual return used in the *How has the fund performed?* table and the *Annual Return Graph* has been calculated based on the appropriate market index for some, but not all, of the assets of the fund (being the S&P/NZX 90 Day Bank Bills Index, used for the fund's investments in cash and cash equivalents).

As a result, the annual return on the market index used may be a less reliable indicator of the performance of the fund as a whole than would be the case if that market index were appropriate for all of the assets of the fund.
